BARIATRIC SURGERY · STERILE · SINGLE USE

Sterile Single Use Gastric Calibration Tube

Medical-grade silicone calibration tube for mini gastric bypass and sleeve gastrectomy, in a standard version and a balloon version.

CE MDR Class IIa | SFDA registered (Saudi Arabia) | ISO 13485:2016

Type I · Standard · 32–40 Fr · 1,200 mm

Type II · With balloon · 32–40 Fr · 745 mm · 30 mL balloon

INTENDED USE

Type I is used in mini gastric bypass and sleeve gastrectomy (LSG) to provide visible and tactile delineation of the stomach, and to decompress the stomach and drain gastric fluid. Type II is used in sleeve gastrectomy (LSG) to drain gastric fluid and calibrate the gastric pouch; its balloon serves as a pyloric stop for positioning.

FEATURES

- Medical-grade silicone, flexible and smooth
- Depth markings and X-ray detectable line for positioning
- Conical connector and universal connector for syringes and suction
- One-way valve
- Sterile (EO), single use; shelf life 2 years

Silicone tip and markings

Type II balloon
