SURGICAL DRAINAGE · STERILE · SINGLE USE

Negative Pressure Drainage Set

Closed wound drainage set combining a silicone drainage tube with a vacuum bulb, guide needle and drainage bag, in four configurations.

ISO 13485

Type IV · drainage tube, guide needle, vacuum bulb and drainage bag

Vacuum bulb · 100 / 200 mL

Guide needle

INTENDED USE

Postoperative drainage of blood, exudate and other fluids from surgical sites under negative pressure, in general, abdominal and orthopaedic surgery and wound management. The vacuum bulb provides manual suction without an external power source.
