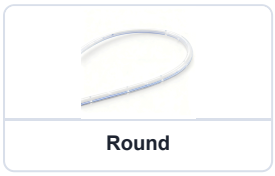
SURGICAL DRAINAGE · STERILE · SINGLE USE

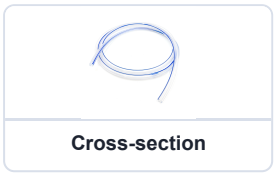
Silicone Drainage Tubes

Medical-grade silicone drainage tubes in five designs, for postoperative drainage of wounds and body cavities.

ISO 13485 | CE MDR Class IIa (10–26 Fr) | FDA registered (510(k) exempt)

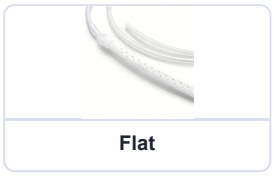


Round



Cross-section

Spiral (anti-clog)



Flat

T-type

INTENDED USE

Postoperative drainage of blood, exudate and pus from wounds and body cavities in general, thoracic and orthopaedic surgery. The T-tube is used for biliary and abdominal drainage.

FEATURES

- 100% medical-grade silicone, soft and flexible
- Five designs: round, cross-section, spiral, flat and T-type; 8–26 Fr
- Cross-section and spiral profiles with multiple drainage channels; spiral design helps prevent clogging
- Sterile (EO), single use
- Also supplied as a negative pressure drainage set with vacuum bulb and guide needle
